It is not provided to the feet deep in the Gordo Water Assn. It is not provided to the feet deep in the Gordo Water Assn. It is not provided to the feet deep in the Gordo Water Assn. It is not provided to the feet deep in the Gordo Water Assn. It is not provided to the feet deep in the Gordo Water Assn. It is not provided to the feet deep in the Gord water assessment has been completed. Our wells were ranked LOWER in terms of susceptibility to confermation. For a copy of the report, please contact our office at 662-324-5222. We are proud to report that the water provided by Talking Warrior Writer Assn. meets or exceeds established water-quality standards.

If you have any questions about this report of concerning your water utility, please contact Joa Williams at 324-5222. We want our valued customers to be informed about their water utility. If you want to learn more, please attend any of our regularly scheduled meetings. They are held on the last Tuesday of each month, under the water tower, on Williams regularly scheduled meetings.

Talking Warrior Water Association routinely monitors for constituents in your drinking water according to Federal and State laws. This table shows the results of our monitoring for the period of January 1<sup>st</sup> to December 31<sup>st</sup>, 2013. As water chemicals, and radioactive substances. All drinking water, including bottled drinking water, may be reasonably expected to contain a floatism time and arganic and organic substances. All drinking water, including bottled drinking water, may be reasonably expected to contain at least small amounts of some constituents. It's important to remember that the presence of these constituents does not nacessarily pose a health risk

In this table you will find mony terms and abbreviations you might not be familiar with. Fo help you better understand these terms we've provided the following definitions:

we've provided the following definitions:

Nonegatests (ND); abstratory analysis industes that the constituent is not present.

Nonegatests (ND); abstratory analysis industes that the constituent is not present as a second paper of \$10,000.

Parts per million (name or Millionans per liter; sone per per billion corresponds to one minute in 2,000 years, or a sincle serior in \$10,000.000.

Parts per billion (name or Millionans per liter; sone per per billion corresponds to one minute in 2,000 years, or a sincle serior in \$10,000.000.

enlandar year of this report. The presence of contaminants in the water does not necessarily indicate that the water poses a health risk, Unless otherwise noted, the data presented in this table is from testing done in the calendar year of the report. The FPA or the State requires us to monitor for certain contaminants less than once per year because the concentrations of these contominants do not change

## Water Quality Data Table

There is convincing	vidence th	at addltic	on of a dis	infect	ant is n	ecessary	for control c	d'microbial contaminants)
Chlorine (us Ci2) (ppm)	-1	4	0.70	0,70	4	2013	No	Water additive used to control interobes
TTIMs [Total Frihalomethaucs] (ppb)	NA	80	2,95	NΑ	2.95	2010	No '	By-product of drinking water disinfection
Haloncetic Acids (HAAS) (ppb)	NA	60	7	NΛ	7	2013	No	By-penduct of drinking water chlorination
inorganic Cootamin	ants							143-141
Arsenic (pph)	0	10	0.614	0,583	0.614	2010	No	Erosion of natural deposits: Runoff from orchards: Runoff from glass and electronics production wastes
làwium (ppm)	2	2	0.0828	0.068	0.0828	2013	No	Discharge of drilling wastes: Discharge from metal refineries: Erosion of natural deposits
Chromium(ppm)	.1	.1	0.0023	0.002	0.0023	2013	Nο	Discharge from steel and pulp mills; Erosion of natural deposits
f luoride (ppm)	4		0,472	0.468	0,472	2013	No	Erosion of natural deposits: Water additive which promotes strong teeth; Discharge from fertilizer and aluminum factories
Nitrite [measured is Nitrogen] (ppm)	1	1	0.09	ND	0.09	3010	No	Runoff from tertilizer use: Leaching from septic tonks, sawnge: Erosian of natural deposits

All sources of drinking water are subject to potential contamination by substances that are naturally occurring or man made. Those substances can be microbes, inorganic or organic chemicals and radioactive substances. All drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that the water poses a health risk. More information about contaminants and potential health effects can be obtained by calling the Environmental Protection Agency's Safe Orinking Water Hotling at 1-800-426-4791.

## The State of Mississippi OKTIBBEHA COUNTY

## AFFIDAVIT OF PUBLICATION

Before me, in and for said county, this day personally came the undersigned representative of the Starkville Daily News, a newspaper published in the City of Starkville, of said county and state, who being duly sworn deposeth and says that the publication of a certain notice, a true copy of which, is hereto affixed has been made for \_\_\_\_\_\ weeks consecutively, to wit:

Dated 5418	210, 2014
Dated —	, 20

Said representative further certifies that the several numbers of the newspaper containing the above mentioned notice have been produced and compared with the copy affixed; and that the publication thereof has been correctly made.
